

## ~ Households & Families ~

### Mason County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

## ~ Households & Families ~

### Mercer County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

## ~ Households & Families ~

### Monroe County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

## ~ Households & Families ~

### Morgan County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

**Kentucky: By The Numbers** is a program in the Department of Community and Leadership Development and the Kentucky Cooperative Extension Service at the University of Kentucky. For more information contact your local Cooperative Extension office or Dr. Julie N. Zimmerman, Associate Professor, Rural Sociology, Department of Community and Leadership Development, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546-0215. email: [jzimm@email.uky.edu](mailto:jzimm@email.uky.edu).

Educational programs of the Kentucky Cooperative Extension Service serve all people regardless of race, color, age, sex, religion, disability, or national origin.  
UNIVERSITY OF KENTUCKY, KENTUCKY STATE UNIVERSITY, U.S. DEPARTMENT OF AGRICULTURE, AND KENTUCKY COUNTIES, COOPERATING  
An Equal Opportunity University

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

## ~ Households & Families ~

### Owen County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

For more information contact your local Cooperative Extension office or Dr. Julie N. Zimmerman, Associate Professor, Rural Sociology, Department of Community and Leadership Development, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546-0215. email: [jzimm@email.uky.edu](mailto:jzimm@email.uky.edu).

Educational programs of the Kentucky Cooperative Extension Service serve all people regardless of race, color, age, sex, religion, disability, or national origin.  
UNIVERSITY OF KENTUCKY, KENTUCKY STATE UNIVERSITY, U.S. DEPARTMENT OF AGRICULTURE, AND KENTUCKY COUNTIES, COOPERATING  
An Equal Opportunity University

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

## ~ Households & Families ~

### Powell County

Julie N. Zimmerman  
September, 2011

Living arrangements and families come in all shapes and sizes. Because of this, counting them can be complicated. To help in understanding the differences, it is important to know what is being counted and what is not being counted.

A **Household** includes all people “who occupy a housing unit as their usual place of residence.”

**Nonfamily households** are those households where either someone is living alone or they live with people to whom they are not related. Some examples include: roommates, same sex couples without children (even if they are legally married in their state of residence), unmarried couples without children, a single householder with unrelated children such as a foster child, etc.

**Family households** have 2 or more people who are related by birth, marriage, or adoption. While we think of family households as having children, a married couple without children still meets the definition of a family household.

**Children under 18 years old** can also be counted in different ways. This issue of Kentucky: By The Numbers provides the number of family households with their **own children** – those who are related to the householder by birth, marriage (stepchild), or adoption.

*For more information on data from the 2010 Decennial Census, see the publication:
