Youth groups often target different segments of those who are under 19 years old. While some programs rely on age, others use the grade in which youth are currently enrolled. This issue of Kentucky: By The Numbers uses data from the 2010 Census to provide common age groupings used in programming for youth.

Since these are not the only groupings that programs use, to see other breakdowns by age, go to the **Age Update** issue of **Kentucky: By the Numbers**:

Youth groups often target different segments of those who are under 19 years old. While some programs rely on age, others use the grade in which youth are currently enrolled. This issue of Kentucky: By The Numbers uses data from the 2010 Census to provide common age groupings used in programming for youth.

Since these are not the only groupings that programs use, to see other breakdowns by age, go to the **Age Update** issue of **Kentucky: By the Numbers**:
