

# Poverty 2012

## Adair County

Julie N. Zimmerman, Rural Sociology  
Department of Community and Leadership Development  
February, 2014

Kentucky's poverty rate tends to be higher than the nation as a whole. In 2012, this was still the case. Child poverty rates, which are typically higher than total poverty rates, also remain above national rates.

While the American Community Survey (ACS) contains estimates with detailed characteristics of those below poverty, county and other local level estimates from the ACS often refer to multiple years.

The **official poverty rates** are available through the U. S. Census Bureau's Small Area Income and Poverty Estimates (SAIPE) program.

*The Kentucky: By the Numbers Data Series provides access to county data to support local decision making. The entire series is available at <http://www.ca.uky.edu/snarl>.*

*Data from the Small Area Income and Poverty Estimates (SAIPE) program include a range for each estimate.*

*This tells us the range within which the estimate most likely falls. For ease of use, these confidence interval ranges have been converted to a margin of error and rounded to one decimal. If you have seen poll results reported in the news, when they say "plus or minus 5 points" (+/- 5) they are telling you the margin of error.*

Since the margin of error tells us how reliable the estimate is, it is important to **always report the margin of error.**

For help in understanding margins of error, see: "[And Now for the Grain of Salt: Margins of Error and the American Community Survey](http://www.ca.uky.edu/snarl/KentuckyByTheNumbers/KYBTNPublications/KYBTNPublications.htm)"

	County		State	
	Estimate	MOE	Estimate	MOE
<b>Poverty Rate, All Ages</b>	<b>27.1%</b>	(+/-) 5.1	<b>19.3%</b>	(+/-) 0.4

# Poverty 2012

## Boyd County

Julie N. Zimmerman, Rural Sociology  
Department of Community and Leadership Development  
February, 2014

Kentucky's poverty rate tends to be higher than the nation as a whole. In 2012, this was still the case. Child poverty rates, which are typically higher than total poverty rates, also remain above national rates.

While the American Community Survey (ACS) contains estimates with detailed characteristics of those below poverty, county and other local level estimates from the ACS often refer to multiple years.

The **official poverty rates** are available through the U. S. Census Bureau's Small Area Income and Poverty Estimates (SAIPE) program.

*The Kentucky: By the Numbers Data Series provides access to county data to support local decision making. The entire series is available at <http://www.ca.uky.edu/snarl>.*

*Data from the Small Area Income and Poverty Estimates (SAIPE) program include a range for each estimate.*

*This tells us the range within which the estimate most likely falls. For ease of use, these confidence interval ranges have been converted to a margin of error and rounded to one decimal. If you have seen poll results reported in the news, when they say "plus or minus 5 points" (+/- 5) they are telling you the margin of error.*

Since the margin of error tells us how reliable the estimate is, it is important to **always report the margin of error.**

For help in understanding margins of error, see: "[And Now for the Grain of Salt: Margins of Error and the American Community Survey](http://www.ca.uky.edu/snarl/KentuckyByTheNumbers/KYBTNPublications/KYBTNPublications.htm)"

Kentucky: By The Numbers is a program in the Department of Community and Leadership Development and the Kentucky Cooperative Extension Service at the University of Kentucky. For more information contact your local Cooperative Extension office or Dr. Julie N. Zimmerman, Professor, Rural Sociology, Department of Community and Leadership Development, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546-0215. email: [jzimm@email.uky.edu](mailto:jzimm@email.uky.edu).

Educational programs of the Kentucky Cooperative Extension Service serve all people regardless of race, color, age, sex, religion, disability, or national origin.  
 UNIVERSITY OF KENTUCKY, KENTUCKY STATE UNIVERSITY, U.S. DEPARTMENT OF AGRICULTURE, AND KENTUCKY COUNTIES, COOPERATING

An Equal Opportunity University

# Poverty 2012

## Campbell County

Julie N. Zimmerman, Rural Sociology  
Department of Community and Leadership Development  
February, 2014

Kentucky's poverty rate tends to be higher than the nation as a whole. In 2012, this was still the case. Child poverty rates, which are typically higher than total poverty rates, also remain above national rates.

While the American Community Survey (ACS) contains estimates with detailed characteristics of those below poverty, county and other local level estimates from the ACS often refer to multiple years.

The **official poverty rates** are available through the U. S. Census Bureau's Small Area Income and Poverty Estimates (SAIPE) program.

*The Kentucky: By the Numbers Data Series provides access to county data to support local decision making. The entire series is available at <http://www.ca.uky.edu/snarl>.*

*Data from the Small Area Income and Poverty Estimates (SAIPE) program include a range for each estimate.*

*This tells us the range within which the estimate most likely falls. For ease of use, these confidence interval ranges have been converted to a margin of error and rounded to one decimal. If you have seen poll results reported in the news, when they say "plus or minus 5 points" (+/- 5) they are telling you the margin of error.*

Since the margin of error tells us how reliable the estimate is, it is important to **always report the margin of error.**

For help in understanding margins of error, see: "[And Now for the Grain of Salt: Margins of Error and the American Community Survey](http://www.ca.uky.edu/snarl/KentuckyByTheNumbers/KYBTNPublications/KYBTNPublications.htm)"
