The Census of Agriculture defines a producer as “a person who is involved in making decisions for the farm operation.” A principal producer is “the person in charge or... person primarily responsible for the on-site, day-to-day operation of the farm or ranch business.” This is comparable to the principal operator in the 2012 Agriculture Census but in 2017 more than one principal producer could be designated for a farm. Demographic and other data “were collected for up to four producers per farm.” As the Census of Agriculture notes, “this may be fewer than the total producers on some farms.”
