## ~ Families and Poverty Update ~

### Bullitt County

Julie N. Zimmerman and Alissa Meyer  
Department of Community and Leadership Development  
February, 2003

While the poverty rate for single parents (male or female) tends to be higher than that for married couples, in over 58 counties in Kentucky, there are more married couples with children living in poverty than single mothers. The Census defines a family as “A group of two or more people who reside together and who are related by birth, marriage, or adoption.” Related children is defined as including “all people in a household under the age of 18, regardless of marital status, who are related to the householder.”

This issue of “Kentucky: By the Numbers” provides data on families with related children living below poverty. This is one of a series of several profiles produced by “Kentucky: By the Numbers” examining different aspects of poverty at the county level in Kentucky.

*“Kentucky: By the Numbers” is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.*

February, 2003

While the poverty rate for single parents (male or female) tends to be higher than that for married couples, in over 58 counties in Kentucky, there are more married couples with children living in poverty than single mothers. The Census defines a family as “A group of two or more people who reside together and who are related by birth, marriage, or adoption.” Related children is defined as including “all people in a household under the age of 18, regardless of marital status, who are related to the householder.”

This issue of “Kentucky: By the Numbers” provides data on families with related children living below poverty. This is one of a series of several profiles produced by “Kentucky: By the Numbers” examining different aspects of poverty at the county level in Kentucky.

*“Kentucky: By the Numbers” is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.*

Maurer, Community and Economic Development Extension Programs, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546 or call (859) 257-7582.

*Educational programs of the Kentucky Cooperative Extension Service serves all people regardless of race, color, age, sex, religion, disability, or national origin.*

# KENTUCKY: BY THE NUMBERS

## ~ Families and Poverty Update ~

### Crittenden County

Julie N. Zimmerman and Alissa Meyer  
Department of Community and Leadership Development  
February, 2003

While the poverty rate for single parents (male or female) tends to be higher than that for married couples, in over 58 counties in Kentucky, there are more married couples with children living in poverty than single mothers. The Census defines a family as “A group of two or more people who reside together and who are related by birth, marriage, or adoption.” Related children is defined as including “all people in a household under the age of 18, regardless of marital status, who are related to the householder.”

This issue of “Kentucky: By the Numbers” provides data on families with related children living below poverty. This is one of a series of several profiles produced by “Kentucky: By the Numbers” examining different aspects of poverty at the county level in Kentucky.

*“Kentucky: By the Numbers” is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.*

<u>All Families</u>	<u>County</u>	<u>State</u>
Total Number of Families Below Poverty (2000)	405	140,519
<i>Percent of all Families Below Poverty (2000)</i>	<i>14.7%</i>	<i>12.7%</i>
