

KENTUCKY: BY THE NUMBERS

~ Housing and Poverty Update ~

Daviess County

Julie N. Zimmerman and Alissa Meyer
Department of Community and Leadership Development
June, 2003

Housing is a critical issue facing many households in poverty. Just as poverty rates tend to be higher in rural areas, so too are rural households in poverty more likely to be homeowners. In nonmetropolitan areas of Kentucky, 55.8% of households below poverty were home owners compared to 31.2 % in metropolitan areas. By contrast, metro households in poverty are more likely to be renters. While home ownership is generally considered to be a more stable form of housing, it is important to remember that many in rural areas still face issues of low quality housing and affordability, even if they own their own homes. This issue of "Kentucky: By the Numbers" is one in a series of several profiles examining different aspects of poverty at the county level in Kentucky.

"Kentucky: By the Numbers" is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.

	<u>County</u>	<u>State</u>
Total Number of Households (above and below poverty) (2000)	36,033	1,590,647

Maurer, Community and Economic Development Extension Programs, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546 or call (859) 257-7582.

Educational programs of the Kentucky Cooperative Extension Service serves all people regardless of race, color, age, sex, religion, disability, or national origin.

KENTUCKY: BY THE NUMBERS

~ Housing and Poverty Update ~

Floyd County

Julie N. Zimmerman and Alissa Meyer
Department of Community and Leadership Development
June, 2003

Housing is a critical issue facing many households in poverty. Just as poverty rates tend to be higher in rural areas, so too are rural households in poverty more likely to be homeowners. In nonmetropolitan areas of Kentucky, 55.8% of households below poverty were home owners compared to 31.2 % in metropolitan areas. By contrast, metro households in poverty are more likely to be renters. While home ownership is generally considered to be a more stable form of housing, it is important to remember that many in rural areas still face issues of low quality housing and affordability, even if they own their own homes. This issue of "Kentucky: By the Numbers" is one in a series of several profiles examining different aspects of poverty at the county level in Kentucky.

"Kentucky: By the Numbers" is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.

	<u>County</u>	<u>State</u>
Total Number of Households (above and below poverty) (2000)	16,881	1,590,647

SEED (Social and Economic Education for Development) is a program of the Kentucky Cooperative Extension Service at the University of Kentucky. Faculty draw on the resources of the Social 'N Agricultural Resource Library (SNARL) and professional contacts at the University of Kentucky, other agencies, and community programs throughout the country. For more information contact your local Cooperative Extension office or Dr. Richard C. Maurer, Community and Economic Development Extension Programs, 500 Garrigus Building, University of Kentucky, Lexington, KY 40546 or call (859) 257-7582.

Educational programs of the Kentucky Cooperative Extension Service serves all people regardless of race, color, age, sex, religion, disability, or national origin.

KENTUCKY: BY THE NUMBERS

~ Housing and Poverty Update ~

Graves County

Julie N. Zimmerman and Alissa Meyer
Department of Community and Leadership Development
June, 2003

Housing is a critical issue facing many households in poverty. Just as poverty rates tend to be higher in rural areas, so too are rural households in poverty more likely to be homeowners. In nonmetropolitan areas of Kentucky, 55.8% of households below poverty were home owners compared to 31.2 % in metropolitan areas. By contrast, metro households in poverty are more likely to be renters. While home ownership is generally considered to be a more stable form of housing, it is important to remember that many in rural areas still face issues of low quality housing and affordability, even if they own their own homes. This issue of "Kentucky: By the Numbers" is one in a series of several profiles examining different aspects of poverty at the county level in Kentucky.

"Kentucky: By the Numbers" is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online at <http://www.ca.uky.edu/snarl>.

	<u>County</u>	<u>State</u>
Total Number of Households (above and below poverty) (2000)	14,841	1,590,647
