~ Migration Update ~

Robertson County

Julie N. Zimmerman and Sarah Michelle Frank
Department of Community and Leadership Development
May, 2005

This issue of "Kentucky: By the Numbers" uses 2000 Census data to look at migration in two ways. The first looks at if a person moved to a different house during the previous 5 years. This can be a different house but in the same place, or a different place altogether. The other way of looking at migration is to compare where people were born to where they live today. In Kentucky, 73.7% of all people were born in Kentucky. Nationally, 59.9% live in the same state in which they were born.

"Kentucky: By the Numbers" is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online in the "Kentucky: By the Numbers" section of our SNARL website at: <http://www.ca.uky.edu/snarl>.

KENTUCKY: BY THE NUMBERS

~ Migration Update ~

Simpson County

Department of Community and Leadership Development
May, 2005

This issue of "Kentucky: By the Numbers" uses 2000 Census data to look at migration in two ways. The first looks at if a person moved to a different house during the previous 5 years. This can be a different house but in the same place, or a different place altogether. The other way of looking at migration is to compare where people were born to where they live today. In Kentucky, 73.7% of all people were born in Kentucky. Nationally, 59.9% live in the same state in which they were born.

"Kentucky: By the Numbers" is a series of county profiles produced on an occasional basis which are developed to support local decision making. The entire series is available online in the "Kentucky: By the Numbers" section of our SNARL website at: <http://www.ca.uky.edu/snarl>.
