

~ Race/Ethnicity ~ 2011 Population Estimates

Mason County

September, 2012

For the years in between Decennial Censuses (conducted every 10 years), the U.S. Census Bureau produces official population estimates. Using data such as the number of births, deaths, and other records, the Census Bureau produces official estimates of the total population, population by age, sex, race/ethnicity, and the estimated change due to births, deaths, and net migration (called "components of population change"). This issue of Kentucky: By The Numbers provides the current 2011 population estimates (April 1, 2010-July 1, 2011) by race and ethnicity.*

While the [American Community Survey](#) includes population figures, they are **NOT** the official counts. To find the official population counts for your county, **always use the population estimates or the 2010 Census**.

* The data by race from the 2010 Census reported in the Census Bureau's population estimates program are slightly different from what you will find in the tables from the 2010 Census or previous issues of Kentucky: By The Numbers. The reason is because in order to produce the estimates using data in pre-existing records, the category "some other race" that is used in the 2010 Census had to be re-coded to fit within one of the existing categories.

* The data by race from the 2010 Census reported in the Census Bureau's population estimates program are slightly different from what you will find in the tables from the 2010 Census or previous issues of Kentucky: By The Numbers. The reason is because in order to produce the estimates using data in pre-existing records, the category "some other race" that is used in the 2010 Census had to be re-coded to fit within one of the existing categories.

For the years in between Decennial Censuses (conducted every 10 years), the U.S. Census Bureau produces official population estimates. Using data such as the number of births, deaths, and other records, the Census Bureau produces official estimates of the total population, population by age, sex, race/ethnicity, and the estimated change due to births, deaths, and net migration (called "components of population change"). This issue of Kentucky: By The Numbers provides the current 2011 population estimates (April 1, 2010-July 1, 2011) by race and ethnicity.*

While the [American Community Survey](#) includes population figures, they are **NOT** the official counts. To find the official population counts for your county, **always use the population estimates or the 2010 Census.**
