Kentucky is the most tobacco-dependent state in the United States. Of the 20 most tobacco-dependent counties in the nation, 17 are located in our state, most of which are located in areas with limited opportunities for off-farm employment. In light of recent changes in this sector, this update provides data comparing tobacco farms and production from the 1992 and most recent 1997 Agricultural Censuses. For more information, see "Overview of Kentucky's Tobacco Economy" by Will Snell and Stephan Goetz at <http://www.ca.uky.edu/agc/pubs/aec/aec83/aec83.htm>

KENTUCKY: BY THE NUMBERS

~ Tobacco Change Update ~

Cumberland County

University of Kentucky, College of Agriculture

October, 2000

Kentucky is the most tobacco-dependent state in the United States. Of the 20 most tobacco-dependent counties in the nation, 17 are located in our state, most of which are located in areas with limited opportunities for off-farm employment. In light of recent changes in this sector, this update provides data comparing tobacco farms and production from the 1992 and most recent 1997 Agricultural Censuses. For more information, see "Overview of Kentucky's Tobacco Economy" by Will Snell and Stephan Goetz at <http://www.ca.uky.edu/agc/pubs/aec/aec83/aec83.htm>
